## ER Studio Data Architect Download PC/Windows

### What's New In?

ER/Studio Data Architect is an integrated reverse engineering, data modeling, consolidation and metadata management software designed to help architects of enterprise data build, share and document data assets across heterogeneous environments. It includes advanced capabilities that allow users to rapidly extract, reverse engineer, and compare data models, manage metadata and publish the information they have discovered, in order to improve their use within the corporate environment. With round-trip database support, data architects using ER/Studio Data Architect have the power to easily reverse-engineer, compare and merge, and visually document data assets residing in diverse locations from data centers to mobile platforms. A range of data sources are supported, ranging from those residing on the cloud to data sources residing on mobile phones. A variety of database platforms, including traditional RDBMS and big data technologies such as MongoDB and Hadoop Hive, can be imported and integrated into shared models and metadata definitions. Features:
