Close the LogonUI Boot Randomizer window.

### What's New in the LogonUI Boot Randomizer?

LogonUI Boot Randomizer is a tool that not only helps users change these two OS elements, but it also adds something new, as it can automatically choose a random logon or boot screen from a location on your computer. The whole idea is pretty simple. Create a folder on your computer and place all the logons and the boot screens in there and configure LogonUI Boot Randomizer to use this folder. Every time you'll reboot the computer, you'll see one logon and one boot screen from the folder you have created. The application works very smoothly and it's quite easy to use, but keep in mind that it's always recommended to perform a backup beforehand, just to make sure your operating system doesn't break down after the first restart. A great feature of the application is its ability to extract and save images for logon and boot not to mention the preview it offers so you can check out the pictures before applying the changes. All in all, LogonUI Boot Randomizer is a decent solution if you've grown tired with the same old look of your Windows XP. It is not difficult to use and the new logon and boot images you can assign will definitely make the OS more attractive at least when it's starting up. 7.44 MB 41 Windows LogonUI Boot Randomizer Paid download LogonUI Boot Randomizer By Skirgl LogonUI Description There are many good reasons to log off your computer. If you're planning to be away from your computer for a while, you might want to turn it off so others can't just turn it back on. You may also want to log off so that your system won't run programs that are running when you log off. Whatever the case, you can always go back to work when you're ready. LogonUI Boot Randomizer will help you keep your Windows XP logon and boot screens consistent each time you start up the computer. It can also automatically change these images for you. LogonUI Boot Randomizer is a tool that not only helps users change these two OS elements, but it also adds something new, as it can automatically choose a random logon or boot screen from a location on your computer.
