Samuel Perlmutter: I get a lot of people that think they can actually outsmart a computer, or outsmart a calculator that just sort of knows what to do with money. I would argue that this is incorrect. So, I have a presentation where I'm going to demonstrate that you can actually, in a very short period of time, come up with a strategy that is better than a computer's strategy, and I'm going to do this with a simple investment. So, let's think about the very simplest, easiest way to invest money. You've got \$1,000, and you want to invest \$1,000 for a certain amount of time. Now, the way I want to illustrate this is that you can actually bet that in the next year there's going to be more growth than there is a decrease. So, the way you can bet that is actually to invest \$1,000, and then buy stock in the company that's going to grow the most
